Art Unit: 1753

DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-4, 7-10, and 12 drawn to an ionic sensor, classified in class 204,

subclass 416.

II. Claims 5, 6, and 11 drawn to a process of making an ionic sensor, classified in

class 427, subclass 2.11.

The inventions are distinct, each from the other because of the following reasons:

Inventions Group I and Group II are related as process of making and product made. The

inventions are distinct if either or both of the following can be shown: (1) that the process as

claimed can be used to make other and materially different product or (2) that the product as

claimed can be made by another and materially different process (MPEP § 806.05(f)). In the

instant case the product as claimed can be made by another and materially different process. The

process of the instant application requires scratches to be made in the non-electroconductive

support and the silver metal layer to be covered with a polymer material in the form a stripe,

which is subsequently peeled off. As shown by Battaglia et al. (US 4,214,968) and Kim et al.

(US 4,272,328) these steps are not necessary to form an electrode composite comprising, in

order, a silver metal layer, a silver halide layer, an electrolyte material layer, and an ion-selective

membrane, as claimed. See Example 3 in column 25 of Battaglia et al. and column 7,

lines 33-44 in Kim et al.

Application/Control Number: 09/981,528

Art Unit: 1753

2. Because these inventions are distinct for the reasons given above and have acquired a

separate status in the art as shown by their different classification, restriction for examination

purposes as indicated is proper.

3. A telephone call was made to Jules Goldberg on September 25, 2003 to request an oral

election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an

election of the invention to be examined even though the requirement be traversed

(37 CFR 1.143).

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the

inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the

currently named inventors is no longer an inventor of at least one claim remaining in the

application. Any amendment of inventorship must be accompanied by a request under

37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

5. Any inquiry concerning this communication or earlier communications from the

examiner should be directed to ALEX NOGUEROLA whose telephone number is (703) 305-

5686. The examiner can normally be reached on M-F 8:30 - 5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, NAM NGUYEN can be reached on (703) 308-3322. The fax phone number for the

organization where this application or proceeding is assigned is (703) 872-9306.
